

**UNITED STATES ENVIRONMENTAL PROTECTION AGENCY  
WASHINGTON, D.C. 20460**

OFFICE OF POLICY

January 11, 2021

Mr. Oliver Potts, Director  
Office of the Federal Register  
Washington, DC

Dear Mr. Potts:

**Re:EPA-HQ-OAR-2020-0372; FRL-10019-21-OAR; RIN 2060-AU91  
Standards of Performance for Volatile Organic Liquid Storage Vessels (Including  
Petroleum Liquid Storage Vessels) for Which Construction, Reconstruction, or  
Modification Commenced After July 23, 1984**

The final action will allow for in-service “top-side” inspections for floating roof tanks, to be consistent with the generic maximum achievable control technology standards program for setting national emission standards for hazardous air pollutants (NESHAP) under Clean Air Act section 112 (see 64 FR 24854, June 29, 1999), the U.S. Environmental Protection Agency (EPA) promulgated 40 CFR part 63, subpart WW (NESHAP subpart WW) which is also applicable to storage vessels containing organic materials. This final rule publication is needed so as to be effective and protect the environment and public health as soon as possible.

**Therefore, we request Emergency Publication on Tuesday January 19, 2021,**

If you have questions, please contact me by email at [franks.martin@epa.gov](mailto:franks.martin@epa.gov) or [FRLiaisons@epa.gov](mailto:FRLiaisons@epa.gov).

Sincerely,

Martin V. Franks
